

Lithium or sodium batteries' transportation (Iberojet)

(If there is doubts, you can contact us at gops.specialrequirements@iberojet.com)

| Type of battery. Watts per hour (Wh)= Ampers hour (Ah) x Voltage (V) | | HAND LUGGAGE | | CHECKED-IN LUGGAGE | |
|--|--|--|--|--|---------------|
| | | Installed battery | Spare battery | Installed battery | Spare battery |
| Ion Lithium max 100 Wh or Metal lithium max 2 g. Ex: mobile phones, cameras, tablets, most laptops, watches, mp3, hearing devices, drones. Smartbags (removable battery). |  | YES (Max. 15 devices) | YES (Max. 20 devices) | YES (Max. 15 devices) | NO |
| Ion Lithium over 100 Wh and max 160 Wh or Metal lithium over 2 g and max 8 g. Ex: Profesional Cameras, medical equipment (AED - Automated External Defibrillators), drones. Powerbanks 20000 mAh - 32000 mAh. Smartbags (removable battery). |  | YES* (Max. 2 devices and requires operator approval) | YES* (Max. 2 devices and requires operator approval) | YES* (Max. 2 devices and requires operator approval) | NO |
| Ion Lithium / Metal lithium. Ex: Powerbanks max 20000 mAh, ecigarrets, epipes and electronic vape pipe. |  | YES (Max. 15 devices) | YES (Max. 20 devices) | NO | NO |
| Ion Lithium autobalance electronic devices whichever the Wh. Ex: Hoverboards, e- skates, oxboards, solo-wheels, waveboards. They are not considered mobility aids. |  | NOT PERMITTED (EVEN WITHOUT BATTERIES) | | | |
| Ion Lithium overs 160 Wh. Ex: bicycles, car batteries. |  | NOT PERMITTED | | | |
| <p>It is permitted max 15 devices containing lithium batteries and 20 lithium powerbanks per passenger with a max of 100 Wh each. This 15/20 limitation can be exceeded with the operators approval. Protect always the powerbanks in order to prevent malfunctions. Isolate each powerbank in a plastic bag, protective bag or the original packaging. Do not carry any powerbank inside the checked-in luggage. If possible, carry your lithium battery devices inside the hand luggage. Do not move your seat if any lithium battery device has slipped or is trapped inside the seat structure. Call the Cabin Crew for help. Damaged batteries are prohibited. If the lithium device heats up, changes its form or starts malfunctioning, alert the cabin crew.</p> | | | | | |
